CHELUVE GOWDA N

UI/UX Designer & Web Developer

cheluveg07@gmail.com 8073012799 LinkedIn Portfolio GitHub

PROFILE

UI/UX Designer with a BCA background and hands-on experience in Figma, HTML, and CSS for responsive web design. Completed an internship at Scontinent Technologies, working on real-time client projects. Skilled in Git and GitHub for version control and project hosting. Proficient in deploying websites using AWS S3, Console, and integrating with databases. Comfortable working in Kali Linux, Ubuntu, and Windows environments.

PROFESSIONAL EXPERIENCE

UI UX Designer Intern 02/2025 - 05/2025
Scontinent Technologies pvt ltd Bengaluru, India

Worked as a UI/UX Design Intern, focusing on user research, wire framing, and prototyping using tools like Figma and Adobe XD. Simultaneously developed skills in responsive design, user testing, and basic front-end development to strengthen design-to-development collaboration.

UI UX Designer Intern 08/2025 – Present
VMA TECH PVT LABS Bengaluru, India

Worked as a UI/UX Design Intern on a dental doctor web and mobile application. Assisted in creating user flows, wireframes, and high-fidelity UI designs using Figma. Supported the team in translating clinical requirements into simple, user-friendly interfaces while following basic usability and responsive design principles.

PROJECTS

E-SHOP – Online Grocery Platform

- Designed and developed end-to-end UX for a daily essentials marketplace targeting bachelors and middle-class families.
- Implemented intuitive navigation flows to ensure a seamless and efficient shopping experience.
- Created clear product categorization and filtering features to improve discover ability and minimize user effort.
- Prioritized usability and accessibility to provide a smooth experience, even for non-tech-savvy users.

GHOST RIDER – Bike & Accessories E-Commerce Platform

- Designed a unified and intuitive interface for browsing a wide range of bikes and accessories, ensuring a smooth and engaging user experience.
- Developed a streamlined checkout flow to minimize user friction and improve conversion rates.
- Integrated category-based navigation and advanced filtering to help users quickly locate relevant products.
- Applied strong visual hierarchy and consistent UI components to enhance brand identity and guide user attention effectively.

AI-Powered Resume Builder (Web Application)

- Designed and developed a responsive AI-based resume builder using HTML, CSS, and JavaScript.
- Integrated Open-AI API to generate personalized, ATS-friendly resume content based on user input.
- Enabled features like dynamic form inputs, template selection, and downloadable resume output.
- Built with scalability in mind for users from different industries and career levels.
